EHA (QLD) INC Enviro-School 2013 aims to provide an intensive, contemporary and highly practical two day environmental professional development program in Queensland.

Enviro-School 2013 will include comprehensive in-field environmental spill response training from a leading environmental consultant followed by recent Council case studies and examples. The case studies will also cover potential cost recovery information, maximising the use of EPA tools and options for fitting out a response vehicle.

Day 2 of Enviro-School will focus on writing, assessing, and monitoring EMP's, incorporating health impact assessment into planning and environmental assessments and optimizing proactive community engagement and social marketing into complaint reduction programs.
